The Max-Pak Difference

Since 1976, Max-Pak has been making quality balers and compactors for the waste industry. It was something we had to do. You see, we’re also in the waste paper recycling business, and 32 years ago we couldn’t find a baler that performed the way we needed. So we built our own.

Being in the waste business has its advantages when you’re designing a baler. Not only do we understand the challenges and demands expected from a baler, we get to test and fine tune our ideas in a real working environment – our own.

For our other baler customers, it means they get the benefit of our front-line experience and our determination to build only the best. A Max-Pak baler is not good enough for our customers unless it’s good enough for us.

At Max-Pak we take a personal interest in every machine we sell, and every customer we serve. It comes from our small town heritage. It’s who we are. So it also makes sense that we deliver and install every baler ourselves, and then train your operators before we leave. We want you to be a friend and a Max-Pak customer for a long time. That’s part of our small town, small company mentality.

But make no mistake. Max-Pak is no lightweight when it comes to balers. You’ll find our equipment in some of the most demanding industries, with some of the most particular companies.

Our customers have come to know and trust Max-Pak for productivity, reliability, and integrity. So it’s no surprise that over 90% of all Max-Pak balers ever built are still on the job. And we plan to keep it that way.

Max-Pak Offers A Full Line of Baling and Recycling Equipment

Workhorses of the Industry
Solid Performance You Can Depend On, Year After Year

Max-Pak’s Vertical Balers are known for their work ethic...year after year, after year. And it’s no wonder, with Max-Pak’s heavy duty construction and our better-than-it-has-to-be approach to electrical and hydraulic components. The first balers we ever made were Verticals, and we learned how to build them the right way.

Max-Pak’s Vertical Balers Offer A New Standard in Serviceability

The Max-Pak Vertical Side Mount balers now offer superior ease of access to power unit components, including the oil tank, motor, hydraulic valve, control panel and junction box. A simple 4-bolt mount allows removal of the entire power unit in minutes for service. Power Unit “cores” may also be returned to Max-Pak for full factory refurbishment, and a core replacement program is available.

The new “Quick Exchange” Power Units are standard on the MP60HD-15 and available on most Max-Pak Vertical Balers.

Solid Performance You Can Depend On, Year After Year

Max-Pak’s Vertical Balers are known for their work ethic...year after year, after year. And it’s no wonder, with Max-Pak’s heavy duty construction and our better-than-it-has-to-be approach to electrical and hydraulic components. The first balers we ever made were Verticals, and we learned how to build them the right way by putting our balers to work in our own recycling facility. It’s fair to say we KNOW Vertical balers, and our customers benefit from that knowledge every day. With 11 different models to choose from, Max-Pak has a Vertical baler to fit your needs – a solid, dependable workhorse for many years to come.
